KV 65 & 110 Dry Vacuum Cleaners

The ultimate in mobile, heavy duty industrial vacuum cleaners. The robust KV 65 & 100 are constructed for a long, trouble free working life. These machines are built around an 18 inch (455mm) heavy gauge, high quality steel canister - carried on a tough electrostatically coated tubular steel caddy. The caddy is fitted with two large rear wheels and two solid rubber castors to make it easy to move, even when full. The exceptional suction power of these machines is provided by either two or three 1,000 Watt, bypass cooling vacuum motors, housed in a rigid steel electrostatically coated motor head. Each motor is switched individually enabling the operator to select the amount of performance required.

FEATURES

- Twin fan bypass cooling motors
- Choice of two or three motors
- Thermal switch protection against overheating
- Double filtration – disposable paper filter and HE cloth filter
- Tough tubular caddy with large wheels and castors
- Carrying handles on side of canister
- Canister detachable from caddy
- Hose entry accepts 32, 38 and 51mm hose and tool kits (38 & 51mm preferred)
- Anti static hose entry and 38mm conductive tool kit to dissipate build up of nuisance static. Available at time of order or as a retro fit.
