## Launch of A•erity<sup>15</sup> and A•erity<sup>10</sup> Single

We are pleased to announce that A•erity now is available for nominal air flow of 1500m<sup>3</sup>/h and 1000m<sup>3</sup>/h. It is a two-stage filter solution with a main filtration and HEPA H13. The built in EcoDrive gives opportunity to control the airflow to fit the customer needs and save energy consumption in the process. The product range is available in all equipment levels for A•erity: Advanced, Professional and Essential.

A•erity<sup>15</sup> will give a nominal air flow of 1500m<sup>3</sup>/h. It is available as a main unit and as a subunit. The possibility to combine a Main unit and a Subunit can give nominal airflows of 3000m<sup>3</sup>/h.

A•erity<sup>10</sup> will give a nominal air flow of 1000m<sup>3</sup>/h and due to the ability with the EcoDrive (EC motor) you can control the air flow to the customer needs.

The A•erity<sup>15-10</sup> will be able to handle particle loads of 10mg/m<sup>3</sup> with particle sizes up to 5% less than 1µm.

Nominal Airflow	1500m <sup>3</sup> / h
Motor / Power / # Phases	EC / 0,55kW – 3 Phase
Voltage / Hz	380V-480V 50/60 Hz
Filter Cassettes	S3B1 + H13
Available External pressure drop	300Pa (with outlet flange)

A•erity<sup>15-20</sup> will be able to handle particle loads of 20mg/m<sup>3</sup> with particle sizes of up to 10% less than 1µm.

Nominal Airflow	1500m <sup>3</sup> / h
Motor / Power / # Phases	EC / 0,55kW – 3 Phases
Voltage / Hz	380V-480V 50/60 Hz
Filter Cassettes	S3B3 + H13
Available External pressure drop	300Pa (with outlet flange)

The A•erity<sup>10-30</sup> will be able to handle particle loads of 30mg/m<sup>3</sup> with particle sizes of 40% less than 1µm.

Nominal Airflow	1000m <sup>3</sup> / h
Motor / Power / # Phases	EC / 0,55kW – 3 Phase
Voltage & Hz	380V-480V 50/60Hz
Cassettes	S10B3 + H13
Available External pressure drop	300Pa (with outlet flange)

Prices are available in the Absolent price list from February 1<sup>st</sup>, 2024.

Product is available for delivery.
